GENERATOR APPLICATION PROCESS - 1

All stand-by generators require three (3) permits to be issued at the same time from the Building Division and must comply with **The Charter Township of Bloomfield Zoning Ordinance and Chapter 14, Article II, Sec. 14-20 Ordinance to Control Excessive Noise**. An additional Building Permit will be required if a screen wall is proposed or if required to screen the generator from public view or to lower the noise level of the generator. ***Once the permits have been issued the installation may commence.***

Electrical Permit – At the time of inspection, the Township will ensure that the generator has been installed according to the 2015 Michigan Residential Code or the National Electrical Code 2014, NEC 2014 Part 8 Rule and according to the Code of the Charter Township of Bloomfield Ordinance Chapter 42 in addition to the 2015 MBC for commercial:

Rear Yard Location – Placed immediately adjacent to the residential building (maximum 5' from the residential wall) and maintaining a minimum 10' side yard setback.

Side Yard or Secondary Front Yard Location – Placed immediately adjacent to the residential building (maximum 5' from the residential wall) and maintaining a minimum 10' side yard setback or 30' **secondary** front yard setback. Placement in a side or secondary front yard shall be screened from view through the use of materials identical to those used on the main building or through the use of evergreen plant material at least the height of the equipment at the time of planting and located at the point of placement of the equipment. Screen walls, shall not be located within the required 10' side yard setback as measured from the side lot line. The screen wall shall screen the equipment at a height not less than the height of the equipment and no more than four (4) feet.

Ground mounted mechanicals are not permitted in a front yard without approval by the Zoning Board of Appeals.

Mechanical Permit – At the time of inspection, the Township will ensure that the generator has been installed according to the 2015 Michigan Residential Code or for Commercial the 2015 Michigan Mechanical Code.

Generator Use Permit – At the time of inspection, the Township will test the generator operating under load for the purpose of ensuring that noise requirements are met according to the Codes of the Charter Township of Bloomfield Chapter 14, Article II, Sec. 14-19 through to Sec.14-24.

Weekly generator testing permitted during daytime hours only. (Periodic testing time between 9 AM and 5 PM weekdays)

Generator decibel level must register 70 db (A) or less at a location 25 feet away from the source from which the sound emanates, with the exception of the measurement provided for in subsections 14-23(g). The owner must comply with the Codes of the Charter Township of Bloomfield Chapter 14, Article II, Noise, through means of additional sound abatement measures. Additional sound abatement measures may be reached with the use of evergreen screening or a sound abatement wall with materials identical to the main building. When the ambient noise is greater than 65dB(A) at the point of measurement, the noise generated from the generator in combination with the ambient noise shall not exceed more than 10dB(A) above the ambient noise.

GENERATOR APPLICATION PROCESS - 2

The screen wall shall screen the equipment at a height not less than the height of the equipment and no more than four (4) feet. Screen walls, other than vegetative screen walls, shall not be located in the required sixteen (16) foot side yard setback as measured from the side lot line.

The following items are required to be submitted prior to permit release:

- \$50.00 Plan Review Fee
- Use Permit Application (Signed by homeowner and electrical contractor)
- Electrical Permit Application
- Current copy of driver's, master's and contractor's license of electrical contractor
- \$135.00 Electrical Permit Fee
- Mechanical Permit Application
- Current copy of driver's and contractor's license of mechanical contractor
- \$165.00 Mechanical Permit Fee
- Engineered site plan or a copy of the mortgage survey (cannot be reduced or enlarged) to include the following
 - Identify all streets and lot lines
 - Orientation of the home
 - Equipment location
 - Setback distance from property line(s)
 - Distance from the wall of the building to the equipment
 - Screening requirements (Placement, material, and height)
- Subdivision Association approval or comments
- Generator specifications and load calculations (total connected load) must be onsite for inspections.

In the event that a screen wall is proposed, the following items are required in addition to the above:

- \$30.00 plan review fee
- Building Permit Application
- Current copy of drivers and contractor's license of building contractor
- A dimensioned and detailed wall cross-section identifying screen wall materials (any wall higher than 4 feet will require a variance from the Zoning Board of Appeals)
- \$120.00 Building Permit fee

A variance from the Zoning Board of Appeals is required for any proposed generator with any of the following issues:

- Front yard installation and nonconforming side and rear yard installations
- Screening wall, other than vegetative screen walls, higher than 4'-0"
- Propane tank installation above ground
- Encroachment into the rear or side yard setback

Operation of the generator is *prohibited* until the noise level has been tested and approved by Bloomfield Township and the decibel level is confirmed to comply with the Codes of the Charter Township of Bloomfield Chapter 14, Article II, Sec. 14-20.

Inspection requests must be scheduled at www.bsaonline.com.

Generators must be screened in accordance with Township Ordinance. In the event inclement weather prevents the installation of the screening, a minimum \$200 cash bond, as determined by the Building Official, will be required at the time of final inspection. The screening must be completed prior to May 1, 20____. Upon verification, the bond will be refunded.

At the time of inspection, the Township will test the generator operating under load for the purpose of ensuring that noise requirements are met.

Weekly generator testing permitted during daytime hours only. (Periodic testing time between 9:00 AM and 5:00 PM, weekdays.)

Generator decibel level must register 70 dB(A) or less at the closest measurement to the property line. If the generator exceeds 70 dB(A) noise level at the closest property line, the owner must comply with the Code of the Charter Township of Bloomfield Chapter 14, Article II, Sec. 14-20 through means of additional sound abatement measures. Additional sound abatement measures may be reached with the use of evergreen screening or a sound abatement wall with materials identical to the main building.

Operation of the generator is prohibited until the noise level has been tested and approved by Bloomfield Township and the decibel level confirmed to comply with the Code of the Charter Township of Bloomfield Chapter 14, Article II, Sec. 14-20.
